Amahric ▬▬

PROFILE

Results-driven Software Engineer with strong skills in full-stack web development, eager to contribute to innovative software solutions within a collaborative, growth-oriented team. Adept at utilizing modern programming languages and frameworks including JavaScript, React.js, Node.js, and MongoDB to deliver high-quality, cutting-edge applications. Multilingual communicator fluent in English, Oromo, and Amharic.

WORK EXPERIENCE

Web Developer

- Collaborated with clients to gather requirements, propose solutions and deliver high-quality, scalable and performance-optimized web applications.
- Implemented responsive web design principle to ensure that websites operated smoothly across different devices and platforms.
- Completed internships at Hawi Software Solution and Adama Smart City Office, where I gained practical experience in software development, and collaborative technology projects aligned with smart city initiatives.

Projects

Acquired Asset Management System

- **Final** year project developed using ASP.NET for a banking client to track assets. Led backend logic and data modeling, collaborating with the UI team, which resulted in a 40% reduction in manual asset tracking errors for a banking client.

University Course Platform

- Engineered a university course platform to efficiently manage course offerings and materials, facilitating improved student and faculty access.

E-Library System

- Developed and implemented a digital library system during an internship, improving resource accessibility for users, improving resource accessibility to handling concurrent users.

Portfolio Website to showcase my personal experience

- I Created a visually appealing and responsive portfolio website that showcased my personal experiences and skills in a journey of website developing process.

Soft Skills:

✧ Problem-Solving,
✧ Teamwork,
✧ Communication,
✧ Adaptability,
✧ Time Management,
✧ Critical Thinking
